Laura is a Manager in the Finance Practice at Growth Operators with experience spanning accounting operations, financial reporting, business systems, and process improvement. She partners with clients to strengthen financial processes, improve operational consistency, and support scalable growth through well-designed systems and workflows.

With a strong understanding of how financial data moves across an organization, Laura brings a unique combination of accounting knowledge and systems thinking. She helps clients translate complex business requirements into practical processes that improve visibility, strengthen controls, and support reliable financial reporting.

Known for her detail-oriented and collaborative approach, Laura works closely with stakeholders to streamline operations, optimize system functionality, and create sustainable processes that align with business objectives. Her ability to connect accounting operations, technology, and process design helps organizations improve efficiency while maintaining strong financial oversight.
