Jake has spent the past six years working with some of the top 100 CPA firms in the nation, establishing himself as a results-driven leader in Accounting and Finance. His expertise lies in managing audit operations with a keen focus on delivering thorough, compliant, and insightful results. Jake brings a strategic approach to account operations, leveraging his in-depth accounting experience to solve problems effectively.

In addition to his audit expertise, Jake is well-versed in accounting process improvement, where he has successfully implemented internal controls to boost accuracy, efficiency, and compliance across financial operations. His experience extends to inventory processes, where he has developed a robust understanding of best practices and methodologies that optimize inventory management and ensure reliable reporting.

Jake thrives on driving impactful change within accounting functions, using his skills to streamline processes and enhance operational excellence. His commitment to high standards and his ability to translate complex financial data into actionable insights make him a trusted partner for organizations aiming to build stronger, more efficient accounting frameworks.
